Classic News

December 2015

Reminders:

- Update your Emergency Call list
- Test phones located in Elevator Banks at least weekly
- Monitoring bills are due within 30 days of receipt ~ Please process payment upon receipt.
- During Tenant construction, testing and/or drills ~ don't forget to put your system in disregard to avoid dispatching the Fire Department.

As another year comes to a close, we at Classic would like to **Thank You** for a great year. We have enjoyed meeting our great customers and servicing your systems this past year.

Happy holidays from The Classic Family!

RADIO COMMUNICATORS ARE HERE!

Radio communication from your buildings fire panel has arrived. Here's a cost effective unit that can save money in the long run. These units do not require telephone lines; it is UL listed and works with most fire alarm panels. For minimum upfront costs, the unit pays for itself within 12 months, compared to the normal cost of operating (2) phone lines for your fire alarm panel. **Call today for a quote on changing to Radio communication!**

MONITORING GOING PAPERLESS

Saving time, space and money are just some of the reasons to go paperless now. In an effort to save trees, file cabinet space and lost monitoring bills in the mail, we are preparing by 2nd Quarter 2016 to email out the Monitoring billings. Yes, that's right - paperless, well somewhat. We have many of our Vendors moving to this type of billing and it seems to be working. So beginning this billing cycle, we would like to get your updated billing information to be sent via email using the attached form.

With this move we are working toward having Monitoring accounts to be paid via a deduction of your checking account (ACH) or Visa/Mastercard charge. Please sign up for Credit Payments or ACH transactions. Complete the back side of the attached form today and email pros@classicprotectionsys.com or fax back to our office today -Fax 713-468-3721. *All delinquent accounts will be moved to this type of payment.*

Thank you for your business!

Phone: (713)468-3573

NEWS FROM THE HOMEFRONT:

HAZARD TESTING

- Did you know that Fire Extinguishers and Fire Hoses are required to be tested annually?
- Did you know that we can service your extinguishers and fire hoses onsite?
- Did you know that your Fire Extinguishers must be serviced every 6 years?

Classic Protection Systems has added Extinguisher, Hood System and Fire Hose testing to the services that we offer your commercial business. Call us today to provide a free quote for your services needed today - 713-468-3573.

RENEWAL OF FIRE ALARM PERMITS

Fire alarm monitoring systems are a direct connection between your building's fire alarm system and your local emergency departments. This is just a friendly reminder to check your local City of Jurisdiction to see if your building is required to have a Fire Alarm permit or Security system permit for monitoring. Each fire or security alarm in operation within certain city limits is mandated by city ordinance to have a permit. It is unlawful for any person to operate, cause to be operated, or allow the operation of an alarm system unless a valid permit issued in accordance with this division is in effect for that system. Just a friendly reminder to stay current with your permits, Building Owners or Management is responsible for applications and renewals, post permits next to your panel and be sure and send Classic a copy for our files and Central Station.

SERVICE CALLS for monitored systems. If you have Central Station calling about a "Runaway" condition on your fire alarm panel, be aware that by NFPA code we are required to correct the situation within 4 hrs. This type of condition will tie up the Central Station lines and could possibly block an emergency situation from being handled. Please feel free to call Classic regarding your service call questions on handling these types of situations, or any of your service needs.

CHANGES TO YOUR PANEL

Any construction or remodeling that occurs within your building that requires adding or deleting fire alarm or burg devices may include adding or deleting devices to your control panel. When this occurs, we must receive an updated list of zone information to Central Station so that we properly identify codes coming from your panels.

SEASONS GREETINGS

We would like to thank you for your continued business throughout the year and we hope that we can continue to provide you with quality service. *Have a Happy Holiday and a wonderful New Year!*
